This document defines the testing and reporting protocols for devices used to calculate flowrates and/or volumes from meters measuring gaseous hydrocarbon fluids. This protocol is designed to supply industry with a comparable description of the capabilities of these devices when they are used under similar operating conditions.

40 CFR Protection of Environment

Sport and exercise physiologists are called upon to carry out physiological assessments that have proven validity and reliability, both in sport-specific and health-related contexts. A wide variety of test protocols have been developed and refined. This book is a comprehensive guide to these protocols and to the key issues relating to physiological testing. Volume I covers sport-specific testing, and Volume II covers clinical and exercise specific testing. With contributions from leading specialist sport, exercise and clinical physiologists, and covering a wide
