preparedness for disaster and attack have evolved over the course of the 20th century and into the 21st. Presidential administrations can have a powerful impact on both national and citizen preparedness. By recommending funding levels, creating new policies, and implementing new programs; successive administrations have adapted preparedness efforts to align with changing domestic priorities and foreign policy goals. They have also instituted administrative reorganizations that reflected their preference for consolidated or dispersed civil defense and homeland security responsibilities within the Federal government. Programs were seldom able to get ahead of world events, and were ultimately challenged in their ability to answer the public's need for protection from threats due to bureaucratic turbulence created by frequent reorganization, shifting funding priorities, and varying levels of
