~~Takashi Nishiyama 's Moon Patrol is widely credited as the first game to feature 2D parallax scrolling, but the technique existed in traditional animation as early as 1933. Using a multiplane camera, animators were able to create a non-stereoscopic 3D effect that created the illusion of depth by allowing different art assets to move at different speeds in relation to the perceived distance from the camera lens.~~

~~Scrolling Background. To make it appear as our character is moving forward we will actually just scroll the background backwards. We will use two background images and move them to the left each frame. Once one of the background images reaches the end of the screen we will reset its position back to the right.~~
