Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

What Papa Told Me, written by the granddaughter of Holocaust survivors, is the story of Murray, a young Jewish boy from Poland whose courage and sheer will to live helped him survive eight different labor and concentration camps in the Holocaust, start a new life in America, and keep a family intact in the aftermath of his wife's suicide - one of the Nazis' last victims.

This book features the latest research in the area of immersive technologies, presented at the 5th International Augmented and Virtual Reality Conference, held in Munich, Germany in 2019. Bridging the gap between academia and industry, it presents the state of the art in augmented reality (AR) and virtual reality (VR) technologies and their applications in various industries such as marketing, education, healthcare, tourism, events, fashion, entertainment, retail and the gaming industry. The volume is a collection of research papers by prominent AR and VR scholars from around the globe. Covering the most significant topics in the field of augmented and virtual reality and providing the latest findings, it is of interest to academics and practitioners alike.

SAS Visual Analytics is a business intelligence and analytics platform that provides visual exploration and discovery, self-service analytics, and interactive reporting for organizations of all sizes. All organizations have a wide variety of users, and each user needs something different from data and analytics. SAS Visual Analytics allows everyone to easily discover and share powerful insights that inspire action. Several useful papers have been written to demonstrate how to use these techniques. We have carefully selected a handful of these from recent Global Forum contributions to introduce you to the topic and let you sample what each has to offer. Vastly entertaining and outright hilarious, Paul Murray's debut heralds the arrival of a major new Irish talent. His protagonist is endearing and wildly witty—part P. G. Wodehouse's Bertie Wooster, with a cantankerous dash of A Confederacy of Dunces' Ignatius J. Reilly thrown in. With its rollicking plot and colorful characters, An Evening of Long Goodbyes is a delightful and erudite comedy of epic proportions. Charles Hythloday observes the world from the comfortable confines of Amaurot, his family estate, and doesn't much care for what he sees. He prefers the black-and-white sanctum of classic cinema—especially anything starring the beautiful Gene Tierney—to the rolling and rumbling of twenty-first-century Dublin. At twenty-four, Charles aims to resurrect the lost lifestyle of the aristocratic country gentleman—contemplative walks, an ever-replenished drink, and afternoons filled with canapés as prepared by the Bosnian housekeeper, Mrs. P. But Charles's cozy existence is about to face a serious shake-up. His sister, Bel, an aspiring actress and hopeless romantic, has brought to Amaurot her most recent—and to Charles's mind, most ill-advised—boyfriend. Frank is hulking and round, and resembles nothing so much as a large dresser, probably a Swedish one. He bets on greyhounds and talks endlessly of brawls and pubs in an accent that brings tears to Charles's eyes. And, most suspiciously, his entrance into the Hythlodays' lives just happens to coincide with the disappearance of an ever-increasing number of household antiques and baubles. Soon, Charles and Bel discover that missing heirlooms are the least of their worries; they are simply not as rich as they have always believed. With the family fortune teetering in the balance, Charles must do something he swore he would never do: get a job. Booted into the mean streets of Dublin, he is as unprepared for real life as Frank would be for a cotillion. And it turns out that real life is a tad unprepared for Charles, as well.

Presents a tale of a precarious friendship between an illegal Nigerian refugee and a recent widow from suburban London, a story told from the alternating and disparate perspectives of both women.

This astronomy travel guide examines the many wonderful opportunities for experiencing the observing hobby. Amateur astronomy is often consigned to observing from home or from a local park, yet it can be much more. Tim Treadwell explores all the possibilities of astronomical and space-related activities that are available on day trips and longer vacations. These activities range from observatory visits and other simple ways to build an astronomy event into a holiday, to full blown specialized astronomy travel. Many trips give the opportunity to visit some of the world's famous attractions. On most vacations it can be a matter of just taking a day (or night) out of your schedule to fit in an astronomy event, but larger, dedicated pilgrimages are also possible. How to make the most of astronomy potential on a holiday, whether observing on the beach in Hawaii with the Telescope Guy or visiting Star City in Russia, is covered in detail. Go to a star party, explore the national parks or see the northern lights! There are a wide variety of activities for all budgets described in this book.

A search and rescue team known as Vulture Squad is sent to an isolated jungle valley to uncover the fate of a missing Green Beret platoon. As they hunt through the primordial depths of the valley, they discover ancient horrors that not only threaten to unravel their minds, but to end their lives as well. When the casualties mount, the men of Vulture Squad must abandon their human nature and give in to their savage instincts in order to survive...the Primitive War. DISCLAIMER - This novel is set in the Vietnam War, and as such, it isn't suitable for children. There is graphic violence, adult language, drug use, and many references to war-borne tragedy.

This comprehensive handbook provides an overview of space technology and a holistic understanding of the system-of-systems that is a modern spacecraft. With a foreword by Elon Musk, CEO and CTO of SpaceX, and contributions from globally leading agency experts from NASA, ESA, JAXA, and CNES, as well as European and North American academics and industrialists, this handbook, as well as giving an interdisciplinary overview, offers, through individual self-contained chapters, more detailed understanding of specific fields, ranging through: · Launch systems, structures, power, thermal, communications, propulsion, and software, to · entry, descent and landing, ground segment, robotics, and data systems, to · technology management, legal and regulatory issues, and project management. This handbook is an equally invaluable asset to those on a career path towards the space industry as it is to those already within the industry.
