The BaAka pygmies of the Congo, who know the forest intimately, call this huge creature Mokele Mbembe, and say that ... searched in vain for this 'living dinosaur'. Is it real, or is it a myth?

Congo

What could be more wonderful than the idea that a living plesiosaur might slide undetected ... However, this episode concerned the alleged dinosaur in the Congo: Mokele Mbembe. Thought by ...

In the heart of the Congo is rumored to live a dinosaur called Mokele-Mbembe, or the god-beast. A handful of scientific expeditions have searched for it over the years with little success, but Nugent relied less on science than a desire to document the obscure. He made his way by dugout canoe and foot to Lake Tele, reputed home of the brontosaurus-like creature. It's an environment little changed since the age of dinosaurs and he spent weeks paddling and trekking the area. He finally spotted a periscope-shaped object moving through the water. But when he tried to get closer, his guides threatened to shoot him, explaining that the "the god can approach man, but man never approaches the god." Nugent's photographs have been reprinted hundreds of times by those who believe in the god-beast. Drums Along the Congo merited inclusion on "Best 50 Books of the Year" list compiled by every major US newspaper.

Explorer, cryptozoologist, and creationist Bill Gibbons has traveled to remote corners of the world in search of strange and unknown creatures. But Bill's heart is in Africa, where monstrous dinosaur-like creatures are still rumored to inhabit the vast swamps of the Congo Basin. In Mokele-Mbembe: Mystery Beast of the Congo Basin, Gibbons provides a fascinating insight into several expeditions that have ventured forth in search of suspected living dinosaurs, include several of his own. Here you will read about many amazing eyewitness testimonies and surprise encounters with these remarkable creatures. This book will take you on a journey into a true "lost world" of pygmy tribes, dense unforgiving jungles, hidden unexplored lakes, and rivers that run for hundreds of miles into a land that time has literally forgotten. No armchair explorer, Gibbons also details several other incredible creatures that by all accounts should have been extinct eons ago, yet are still encountered today by astonished eyewitnesses in the 21st century. Join Bill as he continues on his tireless quest in search of an animal that could well be the most important scientific discovery of this century!

An American explorer and cryptozoologist chronicles his adventures on the Congo searching for the elusive Mokele-Mbembe, a dinosaur-like creature reported to live in the river. By the author of The Search for the Pink-Headed Duck. Original.

Presents arguments for and against the existence of five notable cryptids and challenges the pseudoscience that furthers their legendary statuses, while providing an exploration of the nature and subculture of cryptozoology.

Cues to undiscovered species have been left by missionaries and pastors throughout the world, and explorer Bill Gibbons is hot on their trail. He continues to travel to remote parts of the world investigating cryptozoological mysteries still remaining in God's creation.

According to local legend, a modern-day African dinosaur called the Mokele-mbembe lurks in the murky waters of the Congo Basin rainforest. This elephant-sized version of Diplodocus kills the hippos, elephants, and humans that invade its territory in Lake Tele and vine-choked Likouala Swamp. Many cryptozoological expeditions have been conducted in this inhospitable jungle, with the sole purpose of finding a living, breathing specimen of a type of animal that should have gone extinct 65 million years ago. In Mokele-mbembe: Fact or Fiction?, take a look at the evidence the dinosaur hunters have collected, and decide whether Mokele-mbembe is a real animal or just a figment of the imagination.

In a Publishers Weekly Best Book of the Year, the author recounts his search for the remains of a legendary dinosaur in the Congo, a tale of swamps, soldiers, sorcerers, and a supernatural monster. Reprint. 17,500 first printing.

Twins, Grace and Marty, along with a mysterious uncle, are dropped into the middle of the Congolese jungle in search of their missing photojournalist parents.

A definitive book on the world's best known monster hunt which proves that large unknown creatures do exist in the deep cold waters of the Loch.
