The easiest way to do it is to find a donor Porsche 928 with a manual transmission, and swap over the necessary components. There is also the possibility of piecing together what you will need part by part. That will probably be the more expensive way to go, but will give you the most options when it comes to deciding what transmission to use.

One of the most common issues Porsche 928 owners report is failure of the engine thrust bearing in automatic transmission equipped cars. There are many theories regarding why this part experiences common failure, but in general, the driveshaft puts excessive pressure on the flywheel and drive plate, which eventually wears away the thrust bearings in the engine. The wear, if ignored, can get to ...
