two classes in this diagram that are not defined within the System.Reflection namespace are System.Object and System.Type.

~~Basic Instincts: Reflection in Visual Basic .NET ...~~

Visual Basic for Applications (VBA) refers to a programming language and an associated integrated development environment (Visual Basic Editor) where you can write, edit, and debug macros. The Visual Basic Editor is a component that's built into Microsoft Office, Reflection, and other applications. Each application uses the same Visual Basic Editor with its host application objects.
