David Freedman has taken the art of blacksmithing in a new direction. His metal work ranges from giant insects in the woods of Scotland to seaweed inspired gates on the Cornish coast, ethereal deer in the ancient forests of England and organic seats in some of the UK's finest historic gardens. David's unique sculptural metalwork is shown here at its best, set within the landscape that inspires its creation. David has been forging creative metal sculptures, delicate copper water features, decorative wrought ironwork gates and much more for over 20 years from his backyard workshop in the UK. Rather than a beginner's guide or a blacksmithing manual, this book is more than a catalogue of David's work, with stunning photographs, design notes and sketches as well as perspectives from blacksmiths around the world and a look into the forge, past and present, giving a unique window into the ancient yet ever evolving blacksmith's craft. This collection is also a source of inspiration for those interested in garden design and garden art as well as public sculpture. David is also a writer of articles and fiction. His children's book Stunt Crow is available on Amazon and Jewel of The Brook is forthcoming.

Designed as a comprehensive guide for the beginner or a reference for the advanced metalworker, with complete coverage of tools, equipment, and creative and technical processes. Includes very fine b & w photographs of the work of Samuel Yellin and Martin Rose.

Learn the timeless art of blacksmithing or simply admire the beautiful illustrations of vintage tools of the trade.

Blacksmithing in the modern age has become as much about art as it is about shaping metal. The artist blacksmith must rely on an ability to design to produce original and enduring metalwork, turning steel into sculpture, welding details together in the forge. Casting around for ideas, the artsmith must look at many influences from nature to architecture and beyond. This book looks at the unique design approaches and influences of metal artists, from sketching with wire to paper templates. From the natural world to historical references, artist blacksmiths develop their ideas and hone their techniques. The variety of methods employed is endless and their ingenious solutions endlessly fascinating. David Freedman, an artist blacksmith for over 20 years, draws upon his own work and influences as well as the masterful work of blacksmiths and metal artists he admires. With design sketches, scribbles, photos and ideas from diverse strands of the craft, David looks at what makes good craft skills into great pieces of art, providing inspiration for anyone interested in metalwork and design. Artist Blacksmith Design features the work and design ideas of seasoned artist blacksmiths Brian Russell and Stephen Rook as well as the unique work of Bex Simon and incredible wire work of Portuguese artist David Oliveira.
