Traces a young man's effort to escape the dangers of the streets and his own nature after graduating from Yale, describing his youth in violent 1980s Newark, efforts to navigate two fiercely insular worlds and life-ending drug deals. 75,000 first printing.

An instant New York Times bestseller, named a best book of the year by The New York Times Book Review, Amazon, and Entertainment Weekly, among others, this celebrated account of a young African-American man who escaped Newark, NJ, to attend Yale, but still faced the dangers of the streets when he returned is, "nuanced and shattering" (People) and "mesmeric" (The New York Times Book Review). When author Jeff Hobbs arrived at Yale University, he became fast friends with the man who would be his college roommate for four years, Robert Peace. Robert's life was rough from the beginning in the crime-ridden streets of Newark in the 1980s, with his father in jail and his mother earning less than \$15,000 a year. But Robert was a brilliant student, and it was supposed to get easier when he was accepted to Yale, where he studied molecular biochemistry and biophysics. But it didn't get easier. Robert carried with him the difficult dual nature of his existence, trying to fit in at Yale, and at home on breaks. A compelling and honest portrait of Robert's relationships—with his struggling mother, with his incarcerated father, with his teachers and friends—The Short and Tragic Life of Robert Peace encompasses the most enduring conflicts in America: race, class, drugs, community, imprisonment, education, family, friendship, and love. It's about the collision of two fiercely insular worlds—the ivy-covered campus of Yale University and the slums of Newark, New Jersey, and the difficulty of going from one to the other and then back again. It's about trying to live a decent life in America. But most all this "fresh, compelling" (The Washington Post) story is about the tragic life of one singular brilliant young man. His end, a violent one, is heartbreaking and powerful and "a haunting American tragedy for our times" (Entertainment Weekly).

Presents the life of Robert Peace, an African American who became a brilliant biochemistry student at Yale University, but after graduation lived as drug dealer and was brutally murdered at the age of thirty.

Wandering the streets of Manhattan while thinking about the lives of his three former Yale classmates, a disaffected professional considers

how their respective quests for happiness have remained unfulfilled in spite of their financial successes. A first novel. Reprint. 20,000 first printing.

The acclaimed, award-winning author of *The Short and Tragic Life of Robert Peace* presents a “carefully observed journalistic account [that] widens our view of the modern ‘immigrant experience’” (*The New York Times Book Review*) as he closely follows four Los Angeles high school boys as they apply to college. Four teenage boys are high school seniors at two very different schools within the city of Los Angeles, the second largest school district in the nation with nearly 700,000 students. In this “exceptional work of investigative journalism...laced with compassion, insight, and humor” (*Publishers Weekly*, starred review) Jeff Hobbs stunningly captures the challenges and triumphs of being a young person confronting the future—both their own and the cultures in which they live—in contemporary America. Blending complex social issues with each individual experience, Hobbs takes us deep inside these boys’ worlds. The foursome includes Carlos, the younger son of undocumented delivery workers, who aims to follow in his older brother’s footsteps and attend an Ivy League college; Tio harbors serious ambitions to become an engineer despite a father who doesn’t believe in him; Jon, devoted member of the academic decathlon team, struggles to put distance between himself and his mother, who is suffocating him with her own expectations; and Owen, raised in a wealthy family, can’t get serious about academics but knows he must. Including portraits of secondary characters—friends, peers, parents, teachers, and girlfriends—this “uniquely illuminating” (*Booklist*) masterwork of immersive journalism is destined to ignite conversations about class, race, expectations, cultural divides, and even the concept of fate. Hobbs’s portrayal of these young men is not only revelatory and relevant, but also moving, eloquent, and indelibly powerful.

(Book). A fitting tribute to the troubled genius who revolutionized electric bass playing and bridged the gaps between jazz, R&B, rock and funk. From his early days in R&B club bands through his international stardom with fusion group Weather Report and on to his solo career and tragic death at age 35, this book portrays the life and music of Jaco Pastorius, the self-proclaimed "world's greatest bass player." This special anniversary edition features new interviews with Jaco's childhood friends, prominent bass players of Jaco's era and afterward, and girlfriend Teresa Nagell, who was with Jaco in the last few years of his life. Some incidents from the first edition have been further researched and expanded to become full chapters. Exclusive to this edition, the CD features newly revealed music tracks from Jaco's early years along with spoken testimonials from Jaco's friends and colleagues. The book also contains new, never-before-seen photos acquired from the Pastorius estate.

Hundreds of movies and thousands of books have been written about the

heroes of World War II. For dozens of years, however, few people knew about one of the greatest heroes of the war—a mild-mannered, eccentric mathematician from the University of Cambridge. This man, an undeniable genius whose later life was plagued by controversy and tragedy, probably played a greater role in the eventual Allied victory than anyone else. Until quite recently his contribution to the war effort was barely recognized. Everyone's heard of Churchill, Eisenhower, Montgomery, Patton and even de Gaulle, but far fewer have ever heard of Alan Turing. This is his incredible story.

By the winner of the 2018 Alternative Nobel prize in literature, a novel of twins with a bond so strong they become afraid of their feelings for one another.

This volume offers a critical yet empathic exploration of the ancient myth of Medea as immortalized by early Greek and Roman dramatists to showcase the tragic forces afoot when relational suffering remains unresolved in the lives of individuals, families and communities. Medea as a tragic figure, whose sense of isolation and betrayal interferes with her ability to form healthy attachments, reveals the human propensity for violence when the agony of unresolved grief turns to vengeance against those we hold most dear. However, metaphorically, her life story as an emblem for existential crisis serves as a psychological touchstone in the lives of early twentieth-century female authors, who struggled to find their rightful place in the world, to resolve the sorrow of unrequited love and devotion, and to reconcile experiences of societal abandonment and neglect as self-discovery.

Leo's remains were discovered in a remote cave on the Nullarbor Plain. He was a marsupial lion, *Thylacoleo*, one of Australia's most extraordinary megafauna (extinct giant animals), thought to have lived approximately 500,000 years ago. This fascinating book recreates Leo's life in the period leading up to his early and tragic death. The story also recounts the process by which Leo became a fossil, and then his eventual 'discovery' by contemporary museum scientists. The book also provides an insight into the work of palaeontologists in researching, recovering and investigating fossil remains.
